Connector Types

4S/4M 4-sensor/4-modulator valve design. Optional ATC feature to improve traction under adverse conditions

* On 6 x 4 vehicles, driver must manually engage inter-axle differential for optimum performance

6S/4M 6-sensor/4-modulator valve design. Highest level of ATC traction enhancement Fully automatic - requires no manual driver action.

6S/6M 6-sensor/6-modulator valve design. Highest level of ATC traction enhancement Fully automatic - requires no manual driver action.
