Measuring Flex

When it comes to measuring flex tubing, there is a certain amount of disagreement. Different people measure it in different ways; since it's sold by the foot, disputes can crop up about how much was shipped versus what was ordered.

Since the natural lie of flex is halfway between fully extended and fully compressed, flex is supplied in fully extended lengths plus 2" - 3" extra on 5 foot and 10 foot lengths, or 6" - 8" extra on 25 foot lengths.

Straight Pipe - 10 Foot *16 gauge aluminized*
